History

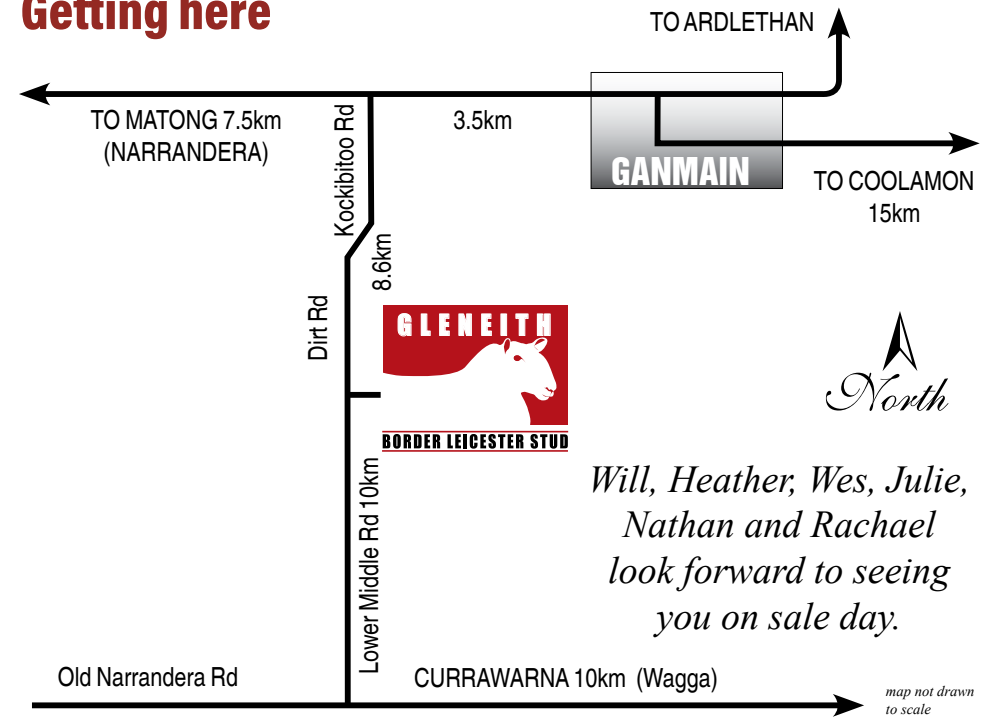

The "Gleneith" Border Leicester Stud was originally established by Fred Kember Snr in 1922. However official Breed Society registration was not sought until 1932 (F665). The stud grew from small beginnings to around 400 ewes being put to the rams in 1944. In 1948 with the death of Fred Kember Snr, the flock slipped from registration. Fred Kember Jnr. purchased the flock from the estate in 1950 and had the flock re-registered with the same prefix of "Gleneith" but with the current flock number (F1929).

Fred Jnr continued breeding Border Leicesters with ewe numbers generally between 300-400. He regularly took his show team to the local shows and also showed at the Albury Sheep Show, which was held in the old Wool Store and then for a few years at the Albury Show Ground. In 1995 the stud incorporated all family members with Will and Wes continuing the stud tradition. Nathan is now the fifth generation of the Kember family to be actively involved in all areas of stud management and in 2004 we held our inaugural on property sale.

Heather & Will, Wes & Julie and Rachael & Nathan Kember with their children Annabelle and Jackson.

SuperBorder\$

Superborder\$ is the brand name for high performing Border Leicesters that have been bred in quality stud flocks and are ranked above average for the breed by Lambplan. The Superborder\$ name is trademarked so that only sheep bred to strict standards may be sold as Superborder\$. To qualify to be a Superborder\$ ram they must have an index above the breed average on August 15th run date and meet individual EBV cut off gates.

The BLX Index

The Border Leicester Cross index is modelled on a production system using sires crossed to merino dams producing first cross progeny. The index identifies high early growth animals with a significant response in post weaning weight and maternal ability. It also aims for an improvement in carcass eye muscle depth and the weaning rate. There is a small improvement in fleece weights. The index also recognises the importance of capping adult weight over time. This index allows for the fact that 50% of the 1st cross performance comes from the Border ram.

© Sheep Genetics 2022

Health Status

Gleneith Stud has obtained OJD MN3v status and all our rams have been vaccinated with Guidar vaccine and are approved vaccinates. We are Ovine Brucellosis Accredited Free Flock and Foot Rot Free.

Stud Rams

Any ram within the sale catalogue can be purchased as a stud ram, with the following criteria.

- A minimum price of \$3000 will apply to a ram purchased as a stud ram
- Must be notified to the auctioneer on the fall of the hammer.

Genomics

Gleneith Stud has Genomic tested ewes since the 2014 drop. Sires are also genomic tested.

KEY

BT	Birth Type, single twin or triplet
BWT	Birth Weight
MWWT	Maternal weaning weight; related to milking ability of the female progeny
WWT	Weaning weight; (6 -16 weeks), with MWWT relevant to the sucker industry
PWWT	Post weaning weight ;(7 – 10 months), a good indicator of the lamb's ability to grow after weaning to market weights
AWT	> 18 months
PFAT	Post weaning fat
PEMD	Post weaning eye muscle depth
YGFW	Yearling (10-13 Months) greasy fleece weight
WR	Combination of conception, litter size and ewe rearing ability
INDEX	Sum total of all of the above, collated to a general lamb/ first cross index.
\$	Signifies \$superborder\$
Acc	Accuracies for EBVs as a percentage

 Purple shaded box represents top 5%

 Blue Shaded Box represents top 10%

 Green shaded box represents top 20%

Gen Genomic Tested

LAMBPLAN EBV's are calculated from raw data collected by breeders and accredited LAMBPLAN operators. LAMBPLAN does not oversee or audit the collection of this data and therefore neither LAMBPLAN nor Meat and Livestock Australia accept any responsibility for the accuracy of the data. LAMBPLAN EBV's are designed to give the best possible estimate of true genetic merit from that data, i.e., the estimate that maximises the correlation between EBV's and true genetic merit. EBV's can only be compared between flocks or between management groups within a flock when a pedigree link exists and that link is used.

LOT 1 - Charity Ram

Lot 1 was picked out by me. Nathan and Wes entered him in the Ganmain show and he was awarded Champion Ram. When the cataloguing was completed, I noticed they put Tag No. 151-23 as Lot 1.

I suggested that the proceeds of Lot 1 could be donated to the Cancer Care Foundation, which Riverina Cancer Care Centre Wagga and Griffith are part of. Having received treatment and care from the Riverina Cancer Care Centre 17 years ago, I feel it is a great cause.

*Thank you for your support.
Julie Kember*

JULY

2024

STAR

DATA QUALITY

Sheep Genetics would like to congratulate and thank you for your hard work and dedication to collecting and submitting high quality data.

Analysis: 7th of July MERINOSELECT & 1st of July LAMBPLAN 2024

How to Register and Bid on AuctionsPlus

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select "Sign Up" in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select "Dashboard" and then select "Request Approval to Buy".
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.
